BONNEY TOOLS

BONNEY Tools have a wide acceptance among mechanics in every branch of industry.

Every Bonney Tool is specially designed for a particular application—combines light weight with strength and enables the user to do each job quickly—easily—well.

Made by Tool Craftsmen with pride in their ability to produce fine hand tools, backed by 67 years of manufacturing experience and proved on the testing ground of time—Bonney Tools have earned the reputation "the finest that money can buy."

There's a Bonney Tool to meet practically every hand tool need.

IMPORTANT

No Bonney Tools are to be returned for credit without permission in writing from the factory.

46 Pieces

1/4 inch Square Drive

Sockets and Attachments

HERE is the most complete set of extra-small and miniature tools ever assembled. It contains an assortment of 1/4" square drive sockets with handles and attachments made of Bonney 'CV' Chrome-Vanadium Steel; miniature box wrenches; miniature open end wrenches; small chisels; punches; screw drivers; hammers and miscellaneous tools. It will be found exceptionally useful by the "tune-up" and

ignition specialist and those who service and install radios, electrical appliances and other small apparatus where parts are small and space in which to work is limited.

All 46 pieces are packed in an attractively finished, sturdily made metal box which measures 11 1/8" x 6 1/8" x 1". Contents include one each of the following:

No.	Description	No.	Description
V6	1/4" SQUARE DRIVE SOCKETS AND ATTACHMENTS	E28	ZENEL OPEN-END WRENCHES (Continued)

STANDARD SERIES DOUBLE HEXAGON SOCKET SETS

1/2 inch Square Drive

No. G Set

No. D Set

No. G Set

11 Pieces

DUE to the constant use which sockets receive, and the unusually hard wear to which they are subjected, many mechanics often find it necessary to replace their assortment of sockets before it is necessary to buy new handles and attachments. The G Set is ideal for this purpose. Consisting of eleven double hexagon sockets in the most necessary sizes for automotive and tractor service work, each one is made of 'CV' Chrome-Vanadium steel, heavily chrome plated and packed in a convenient cardboard box.

The set is also ideal for the mechanic who wants to add to his present tool kit. Contains the following:

'CV' Chrome-Vanadium EXTRA-DEEP SOCKETS

1/2 inch Square Drive

Chromium Plated

BONNEY Extra-Deep Sockets find many applications in automotive service work, but are especially suitable for removing and replacing spark plugs. Their overall length, 3 1/4 inches, and the exceptional depth of their openings, give them an added advantage over ordinary

sockets of similar type.

They are made of Bonney 'CV' Chrome-Vanadium Steel, are carefully heat-treated, heavily chrome plated and polished to a high permanent lustre. They are designed with 1/2" square drive and have hole for use with No. 4092 Cross Handle.

No.	Openings	Length	Diameter

BONNEY ROLLER CABINETS

NO more hunting for lost tools . . . no more lugging tool kits from one job to another . . . Bonney Roller Cabinets keep all your tools in one place all the time . . . and you roll them on the job and off when finished. Bonney Roller Cabinets are made of heavy gauge sheet metal attractively finished in "crackle" tan enamel. They have

rounded edges and are mounted on rubber-tired casters for noiseless, easy movement.

Two styles of Roller Cabinets are available to take your present tool kit or to take the Bonney Sets in metal cabinets mentioned below.

No. C Roller Cabinet

The top of the No. C cabinet is the correct size to hold the No. BB1 Bonney Set shown on page 26, or the No. MC1 Bonney Set shown on page 27. The No. C Roller Cabinet is 24" long, 12" wide, 27" high. It is equipped with center shelf, single door, door lock with key and silent casters.

Net Weight 40 lbs.

No. CC Roller Cabinet

The top of the No. CC Cabinet is the correct size to hold the No. AB Bonney Set shown on pages 28 and 29, or the No. AA2 Bonney Set shown on pages 30 and 31. It is 28" long, 13" wide and 27" high. Equipped with center shelf, double doors, door lock with key and silent casters.

Net Weight 50 lbs.

The Finest that Money Can Buy

NO. "C" ROLLER CABINET WITH BONNEY TOOL SETS

EQUIPPED with either No. BB1 or MC1 Bonney Set, the C Roller Cabinet makes a fine workshop on wheels. It's convenient to move about in the shop—take right to the job. It eliminates the necessity of running back and forth to the bench for needed tools.

The convenient center shelf makes it possible to store parts for the job and keep them safely under lock and key until needed. Illustrated is the No. C Cabinet with the No. BB1 Set shown on page 26. The No. C Cabinet can also be furnished with the No. MC1 Set shown on page 27.

The Finest that Money Can Buy

NO. "CC" ROLLER CABINET WITH BONNEY TOOL SETS

WITH the No. CC Cabinet and the No. AA 2 Set illustrated, a mechanic has a most complete set—one which will care for practically any job encountered. The cabinet makes it easy to roll the set about the shop . . . take it right up to the

job . . . easily and quickly. Rubber tired casters make it possible to do this without noise.

The No. CC Cabinet can also be supplied with the No. AB Set shown on pages 28 and 29.

Stud Wrench

Connecting Rod Socket for Ford V8

Drag Link Socket

No. 2866 to No. 2874

'CV' Chrome-Vanadium SPECIAL SOCKETS

1/2 inch Square Drive

Chromium Plated

Stud Wrench

No. 2591—Made for use with 1/2" square drive handles and attachments, this stud wrench is found indispensable by mechanics for removing and setting studs.

Designed to take studs from 5/16" to 3/4" in diameter, it has an eccentrically mounted roller with a deeply milled edge which provides a non-slipping, non-burring, gripping device.

Made entirely of Bonney 'CV' Chrome-Vanadium Steel, chrome plated and polished.

Connecting Rod Socket For Ford V8

No. F18—A special socket for adjusting Ford V8 connecting rod bearing cap nuts. It has a 9/16" hexagon opening and is equipped for 1/2" square drive.

The nose of the socket is very thin to make this adjustment easily. Made of Bonney 'CV' Chrome-Vanadium Steel, chrome plated and polished. Because of the thin wall construction of this socket, it cannot be guaranteed.

Drag Link Sockets

No. 4001—A drag link socket suitable for adjustments on passenger cars. Made of Bonney 'CV' Chrome-Vanadium Steel, chrome plated.

Blade is 15/16" wide and socket is for use with 1/2" square drive handles.

No. 4002—This drag link socket is designed for drag link adjustments on trucks. Width of blade 1 3/16". Made of Bonney 'CV' Chrome-Vanadium Steel, chrome plated and designed for use with 1/2" square drive handles.

Crowfoot Attachments

Bonney 'CV' Chrome-Vanadium Crowfoot Attachments are useful in making adjustments in "hard-to-get-at" places. Equipped with standard 1/2" square drive.

No. 4201 Series

Drain Plug Squares

Bonney Drain Plug Squares range in size from $\frac{5}{16}$ " square to $\frac{3}{4}$ " square. They may be used with any handle or attachment having $\frac{1}{2}$ " square drive. They are designed for use on drain plugs with square female opening.

Number	Size	Number	Size
P10	$\frac{5}{16}$ "	P18	$\frac{9}{16}$ "
P12	$\frac{3}{8}$ "	P20	$\frac{5}{8}$ "
P14	$\frac{7}{16}$ "	P22	$1\frac{1}{16}$ "
P16	$\frac{1}{2}$ "	P24	$\frac{3}{4}$ "

The No. K Drain Plug Set consists of 8 Drain Plug Squares, 12 sockets and a "T" Handle with $\frac{1}{2}$ " square drive. The K Set will remove or replace drain plugs on the crank case, transmission and differential housing of most cars. Packed complete in strong metal box measuring $10\frac{3}{4}$ " x $3\frac{5}{8}$ " x $1\frac{5}{8}$ ".

Net Weight $7\frac{1}{4}$ lbs.

Drain Plug Squares

No. K Set

The Finest that Money Can Buy

NO. 66 BONNEY

TORQUE-INDICATING WRENCH

No other Torque Wrench like it!

Equipped with standard $\frac{1}{2}$ inch square drive lug, the No. 66 Wrench can be used with any $\frac{1}{2}$ inch square drive socket. The view above shows how easily cylinder head bolts may be tightened uniformly according to manufacturers specifications.

The above illustration shows the No. 66 Wrench being used with the No. 2613 close sweep Box Wrench Attachment in tightening all Chevrolet cylinder head bolts except the center one.

The center cylinder head bolt on Chevrolet engines is particularly difficult to reach because of rocker arm assembly and oil feed line. The No. 66 Wrench with the No. 2614 wide sweep Box Wrench Attachment makes it possible to tighten this bolt uniformly with all other cylinder head bolts.

ELEVEN outstanding features make this wrench the best buy in a torque-indicating wrench for any mechanic.

1. The No. 66 Bonney Torque Wrench has ratchet mechanism that is reversible.
2. It has no dials or gauges to get out of order or be damaged by careless handling.
3. Positive pre-setting of wrench eliminates all chances of error.
4. Three methods of telling when desired torque is reached—
(a) Red ratchet lever snaps to center.
(b) A sharp "click" is heard.
(c) Ratchet mechanism locks.
5. The No. 66 Bonney Torque Wrench is safe to use. The ratchet mechanism locks when the desired torque is reached—it does not allow the handle to swing free, thus preventing smashed fingers for the user.
6. Small head permits use in normally inaccessible places. Not necessary to watch a dial or gauge to tell when desired torque has been reached. No chance of error in reading dial or gauge.
7. Calibrated on a "dead weight" tester. Accuracy of the wrench is greater than consistent performance of bolts on which wrench is used.
8. All working parts carefully hardened, providing long life for wrench.
9. Fastest torque wrench on the market because of ratchet and absence of dials and gauges.
(Wrench is set before starting job and work is done rapidly without slowing down to watch a dial.)
10. Wide range—25 to 125 foot pounds.
11. Has no coil springs.

Pre-set for Accuracy . . . No Dials or Gauges Simple to Operate . . . Positive in Results

The No. 66 Bonney Torque Wrench is extremely simple to operate. All that is necessary is—

1. Set indicator at desired torque (foot pounds). To do this loosen indicator clamping screw slightly, move the indicator to desired position on scale and then tighten screw firmly.
2. Move ratchet lever (red reversing lever) to position at extreme left of wrench.
3. Operate wrench just as any ratchet wrench until the ratchet lever snaps over to the neutral position in center—then stop wrenching. There is a sharp "click" and the ratchet locks as a further signal that this point has been reached.
4. To tighten the next bolt or nut, simply move the ratchet lever back to position at the left of the wrench and repeat. The indicator is not moved except when a change of torque is desired.

You'll like the No. 66 Bonney Torque-Indicating Wrench. It's the simplest, strongest, sturdiest torque wrench on the market. Suitable for use with all $\frac{1}{2}$ inch square drive sockets and attachments. The No. 66 Bonney Torque-Indicating Wrench has the factory approval of Chevrolet, Buick, Oldsmobile, Pontiac, Cadillac, Hudson, Packard, Graham-Paige and G. M. C. Trucks. Length 17 inches overall. Net Weight $4\frac{1}{4}$ lbs.

BONNEY TORQUE INDICATING WRENCHES

*The Finest that
Money Can Buy*

THE No. 056 and No. 56 Bonney Torque-Indicating Wrenches are sturdily constructed with a heavy, ground, spring-steel shaft with pointer which remains rigid.

The scale is conveniently placed near the handle grip and is accurately calibrated in foot pounds of tension. These wrenches are permanently adjusted, light in weight and of rugged construction, with no moving parts to get out of order. The extremely small head with which they are equipped permits their use in places normally inaccessible with other types of torque wrenches.

Both the No. 056 and the No. 56 Wrenches are permanently equipped with $\frac{1}{2}$ " square adaptor and can be used

with all $\frac{1}{2}$ " square drive sockets and attachments.

While the No. 056 Wrench is especially designed for spark plug adjustments, because of the extremely small head and short handle, it can be used in places, within it's capacity, normally inaccessible to other torque wrenches.

Both wrenches are fully chrome plated and highly polished and have knurled handle grip.

No.	Capacity	Length	Weight
056	0 to 50 ft. lbs.	12 $\frac{5}{8}$ "	1 lb.
56	0 to 200 ft. lbs.	23 $\frac{1}{2}$ "	3 lbs.

Bonney Box Wrench Attachments for use with No. 56 and No. 66 Torque-Indicating Wrenches

Designed especially for drawing up cylinder head stud nuts on overhead valve motors with torque-indicating wrenches. These box wrench attachments are drop forged of Bonaloy Steel with plated finish. They have double hexagon box wrench openings and $\frac{1}{2}$ " square drive for use with Nos. 56 and 66 Bonney Torque-Indicating Wrenches and all other torque-indicating wrenches having $\frac{1}{2}$ " square drive.

No.	Double Hexagon Opening and Sweep
2613	$\frac{3}{4}$ " close sweep
2614	$\frac{3}{4}$ " wide sweep
2615A	1 $\frac{1}{16}$ " close sweep
2615	$\frac{5}{8}$ " close sweep
2616	$\frac{5}{8}$ " wide sweep

HEAVY DUTY SOCKET SETS

$\frac{3}{4}$ inch Square Drive

Nos. H and HD Sets

No. HD1 Set

No. HD1 Set - 25 Pieces

AN exceptionally complete set of sockets and attachments that will take care of practically any job encountered where $\frac{3}{4}$ " square drive is necessary.

Sockets and handles are made of Bonney 'CV' Chrome-Vanadium Steel, fully chrome plated. Each piece carries the Bonney Guarantee of quality and satisfaction.

All pieces are packed in a strong, attractively finished metal box measuring $22\frac{1}{2}$ " x $5\frac{1}{2}$ " x $4\frac{1}{2}$ ". Contents are as follows:

No. H and HD Sets - 14 Pieces

EITHER the No. H or the No. HD Set will be found especially adapted to heavy duty work on buses, trucks, tractors and industrial machinery.

The sockets and attachments in each set are identical except that the No. H Set has hexagon sockets, while the No. HD Set has double hexagon sockets.

All pieces are made of Bonney 'CV' Chrome-Vanadium Steel, heavily chrome plated and fully guaranteed. They are packed in an attractively finished metal box measuring $20\frac{1}{2}$ " x $5\frac{3}{4}$ " x 3", with strong carrying handle and padlock hasp. Contents are as follows:

BONALLOY BOX WRENCHES

Both Ends Offset—Double Hexagon Openings

BONNEY Box Wrenches, drop-forged of Bonalloy Steel, are thin, long and light in weight. Different size double hexagon openings are broached in each end of the wrench. Box walls are thin but still have

the exceptional strength of all Bonney Wrenches. Handles are oval, permitting a firm, comfortable grip. All wrenches are chrome plated, with heads buffed to a high, permanent lustre.

'CV' Chrome-Vanadium
Extra-Small Box Wrenches
Both Ends Offset
Different Size Opening Each End

ZENEL Long Type Box Wrenches
One End Offset—Double Hexagon Openings

ZENEL LONG TYPE BOX WRENCHES

One end offset—Double Hexagon Openings—Same size openings both ends.

THIS series of Bonney Box Wrenches has only one end offset and has the same size double hexagon opening in each end of the wrench. They are drop-forged of ZENEL Steel, the toughest, hard

wrench steel ever developed, chrome plated, with polished heads. Handles are panelled affording a firm, comfortable grip. Box walls are thin. Consequently they are light in weight and suitable for work in the "hard-to-get-at" places.

'CV' Chrome-Vanadium EXTRA-SMALL BOX WRENCHES

Both Ends Offset—Different Size Opening Each End

Bonney Extra-Small Box Wrenches are drop-forged of 'CV' Chrome-Vanadium Steel, chrome plated and polished. The two smaller sizes have single hexagon openings, while the two larger sizes have double hexagon openings. They are

ideal for generator, carburetor, starter, electrical and ignition work where parts are small and space in which to work is limited. Every mechanic needs a full set of these wrenches to handle small nuts and bolts.

No.	Openings	Length	No.	Openings	Length

The Finest that Money Can Buy

15° Angle—Double Hexagon Opening

Double Offset Type—Double Hexagon Opening

Interchangeable Tubular Handle

BONNEY HEAVY DUTY BOX WRENCHES

15° Angle - For Use With Tubular Handles - Double Hexagon Opening

BONNEY Heavy Duty Box Wrenches with double hexagon openings are designed for breaking loose or tightening large diameter nuts with a minimum of effort. They will be found especially useful for work on trucks, buses, tractors, steam shovels, industrial machinery, road machinery, etc.

Drop-forged of chrome-alloy steel, they are carefully heat treated to insure the ultimate strength of the steel, and are heavily plated. All have highly polished heads. A positive locking device holds the wrenches firmly in the interchangeable handle designed to give extra leverage for turning the "toughest" nut.

Wrench No.	Size Opening	U. S. S. Bolt Size	U. S. S. Hex. Hd. Cap Screw	S. A. E. Std. Screw & Nut	American Std. Nuts; Size Bolt	American Std. Cap Screws; Size Screw	Thickness of Head	Diam. Shank

BA72	2 1/4				1 1/2		1 1/4	1

Double Offset Type - For Use With Tubular Handles - Double Hexagon Opening

Of exactly the same quality and finish as the 15° angle Heavy Duty Box Wrenches, these wrenches are for use on the same types of work.

The double offset head permits their use in places inaccessible with any other type of wrench.

Wrench No.	Size Opening	U. S. S. Bolt Size	U. S. S. Hex. Hd. Cap Screw	S. A. E. Std. Screw & Nut	American Std. Nuts; Size Bolt	American Std. Cap Screws; Size Screw	Thickness of Head	Diam. Shank

INTERCHANGEABLE TUBULAR HANDLE

For Use with Bonney Heavy Duty Box Wrenches

Made of seamless steel tubing, this interchangeable handle provides the extra leverage necessary in turning large nuts. Holes are provided in each end of the handle to insure positive locking on the spring ball plunger in the ends of the wrench shank.

Combination of any two can be used to make a double end wrench. Handle is heavily plated.

Both 15° Angle and Double Offset Type Heavy Duty Box Wrenches are interchangeable on the handle and the com-

BONALLOY BOX WRENCHES

No. 1808 Series—Single Head Type—Double Hexagon Opening

No. 1820 Series—Striking Face—Offset Type—Double Hexagon Opening

No. 1808 Series - Single Head Type - Double Hexagon Opening

BONNEY Single Head Box Wrenches are drop forged of Bonalloy Steel, carefully heat-treated and heavily chrome plated with polished heads.

Long flat handles afford a comfortable grip and extreme leverage in "breaking-loose" or pulling up large size nuts. All have double hexagon openings.

Wrench No.	Opening	U.S.S. Bolt Size	Hex. Head Cap Screw	S.A.E. Std. Screw & Nut	Length	Wrench No.	Opening	U.S.S. Bolt Size	Hex. Head Cap Screw	S.A.E. Std. Screw & Nut	Length

No. 1820 Series - Striking Face - Offset Type - Double Hexagon Opening

DESIGNED especially for heavy work in close quarters where large nuts must be set up tight or frozen nuts loosened.

They are drop forged of Bonalloy Steel, properly heat-treated

to withstand shocks and have large striking area. Furnished with double hexagon opening and finished in baked gray enamel all over.

BONNEY BOX WRENCH SETS

*The Finest that
Money Can Buy*

No. 29 Set

3 Pieces

THE No. 29 Set contains the three short type box wrenches for which the most general use is found. Drop forged of Bonaloy Steel, they are chrome plated and the heads are buffed to a high, permanent lustre. Handles are oval-shaped and assure a firm, comfortable grip.

They are especially useful in making distributor and carburetor adjustments, installation of heaters, radios, etc. in automobiles where space in which to work is limited.

One each of the following wrenches are included:

Nos. 2804	2805	2806
-----------	------	------

All have both ends offset and different size double hexagon opening in each end. The set may be had in substantial cardboard box or handy, leatherette roll.

No. 36 Set

6 Pieces

The No. 36 Set contains six Bonney Box Wrenches drop forged of Bonaloy Steel with heads offset at a 15° angle. Included in the set are two short type wrenches and four of

the long type. They have different size double hexagon openings. Each wrench is heavily chrome plated, has polished heads and is fully guaranteed.

Included are one each wrenches:

Nos. 2886	Nos. 2890	Nos. 2892
2888	2891	2893

The set may be had in convenient leatherette roll or handy, cardboard box.

No. 39 Set

6 Pieces

Here's a set of 15° angle, long type Bonney Box Wrenches that is the finest money can buy. Drop forged of Bonaloy Steel, each wrench has a different size opening in each end. They are fully chrome plated with heads buffed to a high, permanent lustre.

It contains six wrenches in a strong, cardboard box, one each of the following being included:

Nos. 2890	Nos. 2892	Nos. 2894
2891	2893	2895

BONNEY BOX WRENCH SETS

No. 21 Set

No. Z34 Set

No. 21 Set

4 Pieces

A set of four extra-small box wrenches, that are ideal for work on ignition systems, generators, starters, heaters, etc.

They are drop forged of Bonney 'CV' Chrome-Vanadium Steel, heavily chrome plated and with polished heads. The two smaller sizes have single hexagon openings, while the two larger sizes have double hexagon openings.

Included are one each wrenches:

Nos. E40

Nos. E44

E42

E46

They are packed in a convenient leatherette roll or handy cardboard box.

No. Z34 Set

12 Pieces

THE No. Z34 Bonney Box Wrench Set is an assortment of twelve double end box wrenches for practically all general purpose work.

It contains nine ZENEL long type box wrenches with one end offset and three Bonaloy short type box wrenches with both ends offset. The long type wrenches have the same size double hexagon opening in each end, while the short type wrenches have different size openings in each end. They are heavily chrome plated and have polished heads.

Included are one each of the following:

Nos. Z2814

Nos. Z2822

Nos. Z2830

Z2816

Z2824

2804

Z2818

Z2826

2805

Z2820

Z2828

2806

They may be had in a cardboard box or a sturdy, attractively finished metal box which measures $13\frac{3}{4}'' \times 5\frac{1}{8}'' \times 1\frac{5}{8}''$.

Net Weight in Cardboard Box $5\frac{3}{8}$ lbs.

Net Weight in Metal Box 8 lbs.

BONNEY BOX WRENCH SETS

*The Finest that
Money Can Buy*

No. Z31 Set

No. Z33 Set

No. Z31 Set

6 Pieces

THE No. Z31 Box Wrench Set is an assortment of six long, double end box wrenches with one end offset. The wrenches are drop forged of ZENEL Steel, the toughest, hard wrench steel ever developed. Light in weight and unusually thin, they are especially adapted for work in "hard-to-get-at" places and will stand up under the most severe strains.

They have the same size double hexagon openings in both ends, ranging from $\frac{7}{16}$ " to $\frac{3}{4}$ ". One each of the following wrenches are included:

Nos. Z2814	Nos. Z2820
Z2816	Z2822
Z2818	Z2824

They are heavily chrome plated, with heads buffed to a high, permanent lustre. Can be had in handy, leatherette roll or strong, cardboard box.

No. Z33 Set

9 Pieces

THE No. Z33 Box Wrench Set is an assortment of nine long type, double end box wrenches with one end offset. All are drop forged of ZENEL Steel, are light in weight, unusually strong and have thin, panelled handles that assure a firm, comfortable grip. They are fully chrome plated, the heads being buffed to a high, permanent lustre. These wrenches have the same size double hexagon opening in each end. One each of the following numbers are included:

Nos. Z2814	Nos. Z2820	Nos. Z2826
Z2816	Z2822	Z2828
Z2818	Z2824	Z2830

Furnished in an attractively finished, strong metal box measuring $13\frac{3}{4}$ " x $5\frac{1}{8}$ " x $1\frac{5}{8}$ " or in cardboard box.

Net weight, in Metal box $7\frac{1}{2}$ lbs.

Net weight, in cardboard box 5 lbs.

ZENEL MINIATURE and ELECTRICAL WRENCHES

ZENEL Miniature Wrenches

ZENEL Electrical Wrenches

ZENEL Miniature Wrenches

BONNEY ZENEL Miniature Wrenches are ideal for delicate work such as adjustments on magnetos, generators, radios, timers, air cleaners, carburetors, electrical parts and similar jobs.

Bonney Miniature Wrenches are drop forged of ZENEL, the hardest, tough wrench steel on the market. They are fully guaranteed. Designed with concave handles to insure a secure grip, they have narrow pear-shaped heads and are perfectly balanced. They are fully chrome-plated with polished heads and have different size openings in each end.

Wrench No.	Openings Milled	Length	Thickness Heads
H10	$\frac{3}{16}$ & $\frac{7}{32}$	$2\frac{1}{2}$ "	$\frac{3}{32}$ "
H12	$\frac{1}{4}$ & $\frac{9}{32}$	3"	$\frac{5}{32}$ "
H14	$\frac{5}{16}$ & $\frac{11}{32}$	$3\frac{3}{4}$ "	$\frac{3}{16}$ "
H15	$\frac{9}{32}$ & $\frac{3}{8}$	$3\frac{3}{4}$ "	$\frac{3}{16}$ "
H16	$\frac{3}{8}$ & $\frac{7}{16}$	$4\frac{1}{8}$ "	$\frac{7}{32}$ "
H18	$\frac{13}{32}$ & $\frac{15}{32}$	$4\frac{1}{8}$ "	$\frac{7}{32}$ "

No. 20 Miniature Wrench Set

The No. 20 Bonney Miniature Wrench Set is exceptionally useful for work on radios, magnetos, generators, air cleaners and similar types of work.

It contains five ZENEL Miniature Open End Wrenches, one each:

Nos. H10 No. H14
 H12 H16
 Nos. H18

with openings listed in the table above.

ZENEL Electrical Wrenches

BONNEY Electrical Wrenches are drop forged of ZENEL Steel and are designed to take care of practically any wrench requirements for that class of work. They have different size openings in each end—one being placed at 15° angle, the other at 60° angle.

*Will be supplied until stock is exhausted.

They are carefully heat treated, fully chrome plated with buffed heads and are fully guaranteed.

Wrench No.	Openings		Length	Thickness
	15° End	60° End		
E14	$\frac{13}{64}$ "	$\frac{15}{64}$ "	3"	$\frac{7}{64}$ "
E16	$\frac{15}{64}$ "	$\frac{13}{64}$ "	3"	$\frac{7}{64}$ "
E18	$\frac{7}{32}$ "	$\frac{1}{4}$ "	3"	$\frac{7}{64}$ "
E20	$\frac{1}{4}$ "	$\frac{7}{32}$ "	3"	$\frac{7}{64}$ "
E22	$\frac{9}{32}$ "	$\frac{5}{16}$ "	$3\frac{1}{2}$ "	$\frac{1}{8}$ "
E24	$\frac{5}{16}$ "	$\frac{9}{32}$ "	$3\frac{1}{2}$ "	$\frac{1}{8}$ "
E26	$\frac{11}{32}$ "	$\frac{3}{8}$ "	4"	$\frac{9}{64}$ "
E28	$\frac{3}{8}$ "	$\frac{11}{32}$ "	4"	$\frac{9}{64}$ "
*E30	$\frac{7}{16}$ "	$\frac{1}{2}$ "	$4\frac{1}{2}$ "	$\frac{5}{32}$ "

Electrical Wrench Sets

No. 15 Set

12 Pieces

This is the most complete electrical set offered—contains 9 ZENEL Wrenches, one screw driver, an ignition plier and an ignition feeler gauge. It may be had in cardboard box or leatherette roll. Included are one each:

No. E14 Wrench No. E26 Wrench
E16 " E28 "
E18 " E30 "
E20 " 001 Pocket Size Screw Driver
E22 " B424 Channellock Ignition Plier
E24 " K52 Ignition Feeler Gauge

No. 16 Set

9 Pieces

This set is exactly the same as the No. 15 set except that it consists of the electrical wrenches only. One each of the following are included—Nos. E14, E16, E18, E20, E22, E24, E26, E28 and E30.

IGNITION WRENCHES

BONNEY Ignition Wrenches are designed to take care of specialized operations in the repair of starters, generators, etc. of various types, as listed in the table below. All are forged of 'CV' Chrome-Vanadium Steel, chrome plated. Every mechanic should include in his tool kit a complete set of these wrenches to take care of the ignition work which

comes into his shop. The table below lists the various wrenches available and the ignition systems for which they are adapted.

The Finest that Money Can Buy

No.	Description	No.	Description
E2	Northeast, Splitdorf, Bosch	E7	Bosch Du 4 or Du 6, Autolite
E3	Eisemann	E8	Delco-Remy
E4	Remy, Wagner	E9	Remy Cam
E5	Remy, Wagner	E10	Autolite Generator
E6	Ford, Third Brush	E11	Bosch

No. 18 Ignition Set

10 Pieces

The Bonney No. 18 Ignition Set contains ten ignition wrenches, all made of 'CV' Chrome-Vanadium Steel. They are designed for work on the most popular ignition and electrical systems, such as Autolite, Bosch, Delco, Eisemann, Northeast, Remy, Splitdorf, Westinghouse, etc. Each wrench is designed to be the most efficient for its particular application. They are light in weight and so strong that they are fully guaranteed.

Contains one each of the following:

Nos. E2	Nos. E5	Nos. E9
E3	E6	E10
E4	E7	E11
	E8	

No. B424 Ignition Plier

Note the Channellock

Drop forged from finest quality alloy steel, carefully heat-treated, this plier has unusual strength because of the patented Channellock design.

The strain is removed from the bolt because of the Channellock feature, and there is no danger of the bolt breaking.

Has polished finish—four adjustments. Length 4½". Net weight 1⅓ ounces.

Money Can Buy*

ZENEL ENGINEERS' WRENCHES

BONNEY ZENEL

Wrenches are the culmination of years of research and experimentation

by Bonney engineers and metallurgists to discover a wrench steel that is the ultimate in toughness, wear resisting properties and strength. This research resulted in the selection and use of ZENEL, the hardest, tough wrench steel on the market today. Bonney ZENEL Wrenches not only stand up well under exceptionally severe service, but are virtually unbreakable. In fact, they actually outlast two or three wrenches made

from ordinary steels.

By taking advantage of the peculiar properties of this new steel, Bonney has been able to redesign the wrenches themselves. As a result, all ZENEL Wrenches have a handle section which is concave, and which allows the mechanic to obtain a firm, comfortable grip on the wrench. A reduction in the width of the wrench heads also offers additional advantages.

The Bonney ZENEL Engineers' Wrenches listed below have all these features. They are fully chrome plated with polished heads, inspected and rigidly tested.

Wrench No.	Openings Milled	U. S. S. Bolt Size	Hex. Head Cap Screw	S.A.E. Standard Screw & Nut	Extreme Length	Thickness of Head
3020	$\frac{1}{4}$ & $\frac{5}{16}$	$\frac{1}{8}$ & $\frac{1}{8}$	$\frac{1}{8}$ & $\frac{3}{16}$	$\frac{41}{4}$	$\frac{3}{16}$

No. Z25 Wrench Set

Bonney Engineers' Set No. Z25 contains six ZENEL Engineers' Wrenches as follows:

Nos. 3723
3025
3027C

Nos. 3028S
3731A
3033C

as listed in the table above.

This set is supplied either in cardboard box or handy leatherette roll.

No. Z26 Wrench Set

The No. Z26 Bonney Wrench Set is very complete, containing eight ZENEL Engineers' Wrenches as follows:

Nos. 3727
3725
3725B
3025

Nos. 3727
3729
3029
3731A

as listed in the table above.

ZENEL TAPPET WRENCHES

*The Finest that
Money Can Buy*

BONNEY Tappet Wrenches of the 3420 series are made of ZENEL, the Bonney Wrench Steel described on the previous page. The handles of this series of Bonney Wrenches have concave sections which allow the mechanic to take a firm grip on the wrench so that he may easily make accurate adjustments. The handles are long, ranging from eight inches on the wrenches with the smaller size openings to 9½ inches on those with the larger size openings. All these tappet

wrenches have their openings at an angle of 15°, and have different size openings in each end. Bonney ZENEL Tappet Wrenches are perfectly balanced, lighter in weight than ordinary steel wrenches, and have thin, pear-shaped heads. They are thoroughly tested, rigidly inspected and are chrome plated with heads buffed to a high, permanent lustre.

The table below lists the complete 3420 line of Bonney ZENEL Tappet Wrenches.

Wrench No.	Openings Milled	S. A. E. Std. Screw & Nut	U. S. S. Bolt Size	Extreme Length	Thickness of Head
3420A	7/16 & 1/2	1/4 & 5/16	& 1/4	8	5/32
3420	7/16 & 17/32	1/4 & 5/16	8	5/32
3422	1/2 & 9/16	5/16 & 3/8	1/4 & 5/16	8	5/32
3424B	9/16 & 5/8	3/8 & 7/16	8½	3/16
3424	5/8 & 11/16	7/16 & 1/2	& 3/8	8½	3/16
3424A	5/8 & 3/4	7/16 & 1/2	8½	3/16
3425	3/4 & 13/16	1/2 & 9/16	9	7/32
3426	3/4 & 7/8	1/2 & 9/16	& 1/2	9	7/32
3428	15/16 & 1	5/8 & 11/16	9½	7/32

No. Z22 Tappet Wrench Set

The No. Z22 Tappet Wrench Set contains six Bonney ZENEL Tappet Wrenches, two each of the following wrenches making up the set:

Nos. 3422 3424 3426

with openings as listed in the table above.

No. Z23 Tappet Wrench Set

The No. Z23 Tappet Wrench Set contains two each of four sizes of the No. 3420 series ZENEL Tappet Wrenches as follows:

Nos. 3420 Nos. 3424
3422 3426

They have openings as listed in the table above.

The Finest that Money Can Buy

'CV' Chrome-Vanadium ENGINEERS' WRENCHES

BONNEY 'CV' Chrome-Vanadium Engineers' Wrenches are thinner, longer and stronger than carbon steel wrenches with the same size opening. The use of Bonney 'CV' Chrome-Vanadium Steel allows refinement of design both in the shape and the thickness of the wrench head. In addition, the thin, pear-shaped head, made possible by the use of this steel, makes the Bonney 'CV' Line lighter, better

balanced and more serviceable. This is especially important where it is necessary to work in confined places and still have exceptional strength in the wrench. All Bonney 'CV' Engineers' Wrenches are chrome plated with heads buffed to a high, permanent lustre, are rigidly inspected and are fully guaranteed.

No. 25 'CV' Chrome-Vanadium Engineers' Wrench Set

The No. 25 Bonney Engineers' Wrench Set was assembled to offer the mechanic and general user a wrench set to cover all of the most popular sizes of nuts and bolts. Every wrench in the No. 25 Set has a different size opening in each end. They are made of 'CV' Chrome-Vanadium Steel, are light in weight and have pear shaped heads to easily gain access to the "hard-to-get-at" places.

The No. 25 Set contains one each of the following wrenches:

Nos. 1723

No. 420 SERIES 'CV' Chrome-Vanadium TAPPET WRENCHES

EVERY wrench in the No. 420 Series has a different size opening in each end. The openings are at a 15° angle. The wrenches of the No. 420 Series also "step up" correspondingly in length. They are of exceptionally long design, have thin, pear-shaped heads and are fully guaranteed when used for tappet adjusting.

Wrench Number	Openings Milled	S.A.E. Std Screw & Nut	U. S. S. Bolt Size	Length	Thickness of Head
420A	7/16 & 1/2	1/4 & 5/16	& 1/4	8	5/32

*Will supply until stock is exhausted.

No. 22 Tappet Wrench Set

The No. 22 Tappet Wrench Set is complete and adaptable to almost every make and model of passenger car and truck. It contains two each of the following No. 420 Series Tappet Wrenches:

No. 422 No. 424 No. 426 with openings as shown in the above table.

They are made of 'CV' Chrome-Vanadium Steel and "step-up" correspondingly in length to make tappet adjusting easier. All have openings set at 15°. Packed either in cardboard box or leatherette roll.

No. L402 Series Extra Long Tappet Wrenches

These extra-long, thin, tappet wrenches are specially suited for tappet adjustments on late model cars where it is necessary to make adjustments from underneath the car. Heads are extremely thin, with openings at 22 1/2°. Made of 'CV' Chrome-Vanadium Steel, chrome plated, with polished heads.

Wrench Number	Opening Milled	S. A. E. Std. Screw & Nut	U. S. S. Bolt Size	Extreme Length	Thickness of Head

No. 420 Series

No. L402 Series

No. 401 SERIES 'CV' Chrome-Vanadium TAPPET WRENCHES

*The Finest that
Money Can Buy*

BONNEY 'CV' Chrome-Vanadium Tappet Wrenches of the 401 Series are of the proper length (eight inches) therefore allow the mechanic to work clear of the motor when it is hot. The angle of the heads also allows him to reach around into normally inaccessible locations.

Most cars require three wrenches to make

complete tappet adjustments. Consequently, the 401 Series Tappet Wrenches are designed so that two may be worked like scissors with one hand while the third is used in the other hand. Both openings in this series are of the same size but are at different angles. One opening is straight, the other at 22½°.

Wrench No.	Openings Milled	S.A.E. Std. Screw & Nut	U.S.S. Bolt Size	Extreme Length	Thickness of Head
401	3/8			8	5/32

409	1	11/16		8	7/32

No. 412 Tappet Wrench Set

The No. 412 Tappet Wrench Set will handle the tappet adjustments on a large number of makes of cars and trucks. It contains two each of four sizes of the No. 401 series as follows:

Nos. 402 Nos. 404
403 405

with openings as shown in the table above.

Both openings in each wrench are the same, but one opening is straight while the other is at 22½° degrees.

They are made of 'CV' Chrome-Vanadium Steel, chrome plated.

The Finest that Money Can Buy

BONALLOY TUTYPE WRENCHES

Combination Box and Open End

DROP-FORGED of Bonalloy Steel, heavily chrome-plated with buffed heads, the advantages of this type of wrench are readily apparent to the experienced mechanic. Providing an open end and box wrench, each with the same size opening in the same tool, permits using the end most applicable to the job on hand.

The wide range of sizes in which they may be had makes them

adaptable for work on carburetors, generators, manifolds, clutches and starters, as well as general service work on trucks, buses, farm, industrial, oil drilling and refinery equipment. The box end has double hexagon openings, with heads set at 15° to give proper clearance for obstructions. The open end is adapted at 15° for efficiency.

'CV' Chrome-Vanadium RIGHT ANGLE WRENCHES

BONNEY 'CV' Chrome-Vanadium Right-Angle Wrenches are designed for work in close quarters where it is impossible to use wrenches with openings at 15° or 22½°. Difficult adjustments of this type are found in work on brakes, manifolds, cylinder-heads, etc. The heads of Bonney

'CV' Right-Angle Wrenches are pear-shaped and of similar design to Bonney 'CV' Engineers' Wrenches. The handles are shaped to give the user a comfortable grip. They are chrome plated and have buffed heads. All are rigidly inspected, tested and are fully guaranteed.

No. 40 Right-Angle Wrench Set

This set, composed of wrenches drop-forged of 'CV' Chrome-Vanadium Steel, contains one each of the following numbers:

Nos. 2723
2025

No. 2027C

Nos. 2028S
2731A

There are no duplicate openings, and they will fit U. S. Standard nuts, S. A. E. nuts and hexagon cap screws, as shown in the table.

'CV' Chrome-Vanadium SOCKET WRENCHES

BONNEY Solid Socket Wrenches are forged from 'CV' Chrome-Vanadium Steel. The socket and shank are forged in one piece. The sockets are designed so as to provide a reasonable depth, while the outside diameter of the socket is held down as far as practical to permit of the greatest possible clearance in operation. They are chrome plated, with polished heads on the sockets.

CONSTRUCTION WRENCHES

DROP-FORGED of Bonney 'CV' Chrome-Vanadium Steel these open end construction wrenches have openings at 15° angle. Handles are long and tapered for ease in lining up bolt holes. They are carefully heat treated and fully chrome plated.

15° ANGLE

STRUCTURAL BOX WRENCHES

DOUBLE HEXAGON OPENING

DROP-FORGED of Bonaloy Steel, these structural box wrenches are designed with maximum clearance at the offset, allowing the double hexagon opening a full grip on the nut at all times. Handles are long and tapered for ease in lining up bolt holes.

Bonney Structural Box Wrenches have definite safety features that recommend their use wherever an open end structural wrench is not required.

They are carefully heat treated, have plated finish and polished heads.

No.	Nominal Opening	For U.S. Std. Nut; Size Bolt	Extreme Length Approx.	Approx. Weight each, Pounds

ANGLE HEAD SERVICE WRENCHES

This line of Wrenches is especially suitable for production and service work. They are designed to take all the leverage that the extremely long handles will allow. They may also be used to make tappet adjustments on certain makes of cars.

STRUCTURAL WRENCHES

Bonney Structural Wrenches are drop forged of Bonney 'CV' Chrome-Vanadium Steel, carefully heat treated their entire length and heavily chrome plated to resist rust. Openings are straight, but heads are offset to provide maximum clearance. Handles are long, thin and tapered to provide ease in lining up bolt holes.

RIM WRENCHES

No. 2420 Series

THE Bonney Rim Wrenches listed in the table below are all made in one piece from selected Steel, and have hexagon openings. They have plated finish and will take care of practically all sizes of rim nuts.

No.	Opening
2420	5/8"
2422	11/16"
2424	3/4"
2426	13/16"
2428	7/8"

* No. 2553 Cross Rim Wrench

A quality tool needed by every garage and service station. Made of 'CV' Chrome-Vanadium Steel, it is chrome plated, with polished heads. Has 5/8", 3/4", 13/16" and 7/8" openings. A "four-in-one" tool to meet practically every need for a rim wrench.

*Will supply until stock is exhausted.

Truck Rim Wrenches

Nos. 7940 and 7941 are designed especially for use on Ford truck rim nuts. No. 7944 is for rim nuts on practically all other makes of trucks, and the 7942 is a handle and pry bar for use with the wrenches mentioned above. All have plated finish and are the usual Bonney quality in every way.

No.	Openings	Length
7940	13/16" square & 1 1/8" hexagon	16 7/8"
7941	13/16" square & 1 1/2" hexagon	16 7/8"

No. 1950 for 1939 Steering Worm Adjustment

A wrench drop-forged of Bonney 'CV' Chrome-Vanadium Steel and designed especially for the steering worm adjustment on the 1939 Chevrolet. Fully chrome plated, with polished head. Has $1\frac{9}{16}$ " opening and is $12\frac{1}{2}$ " long.

No. 1950

No. 2881 Starter and Manifold Wrench

Starter and manifold work on Chevrolet and other cars is simplified by this wrench. The openings are $\frac{9}{16}$ " and $\frac{5}{8}$ " inch double-hexagon. Length $7\frac{3}{4}$ inches. Made of 'CV' Chrome-Vanadium Steel, chrome plated.

Nos. 2881 and 2884

No. 2884 Starter Wrench

Designed especially for adjustments on 1937 and 1938 Chevrolet starters. Made of 'CV' Chrome-Vanadium Steel, chrome plated, with polished heads. Has $\frac{9}{16}$ " and $\frac{3}{4}$ " double hexagon openings. Length $7\frac{3}{4}$ inches.

No. 2540

*No. 2540 Main Bearing Wrench

For adjusting Chevrolet "4" main bearings. Overall length 13 inches. Has $\frac{13}{16}$ inch and $\frac{7}{8}$ inch double hexagon openings.

No. 2597

*No. 2597 Cylinder Head Wrench

Designed especially for cylinder head stud nuts on 1937 model Chevrolet. Has $\frac{3}{4}$ inch double hexagon opening in each end. Made of 'CV' Chrome-Vanadium Steel, chrome plated. Overall length $16\frac{5}{8}$ ".

No. 2592

*No. 2592 Main Bearing Wrench

Especially designed for work on Chevrolet Main Bearings. Has $\frac{11}{16}$ " and $\frac{3}{4}$ " double hexagon openings. Overall length 16 inches.

*No. 2840 Main Bearing Wrench

Used for adjusting Chevrolet "6" main bearings. Has $\frac{5}{8}$ inch and $\frac{3}{4}$ inch double hexagon openings. Overall length $13\frac{1}{2}$ inches.

*Will supply until stock is exhausted.

No. 2840

*The Finest that

SPECIAL WRENCHES FOR FORDS

No. 2626

*No. 2626 Drain Plug Wrench For '39

A drop-forged wrench of BONALLOY Steel designed especially for removing and replacing the drain plug on 1939 Ford standard and deluxe and Mercury cars. It is chrome plated, has 2" double hexagon opening. Head is offset at 20°. Length overall 10 $\frac{3}{4}$ inches.

Nos. 2857 and D2857

Nos.*2857 and D2857 Brake Wrenches

Special wrenches for work on Ford brakes. They have $\frac{7}{16}$ inch and $\frac{1}{2}$ inch openings. No. 2857 has square openings. No. D2857 double square openings. Overall length 10 $\frac{3}{4}$ inches.

No. 2587

No. 2587 Main Bearing Wrench

Work on Ford main bearings is speeded with this wrench. Has $\frac{9}{16}$ inch double square and $\frac{3}{4}$ inch double hexagon openings. Overall length 16 inches.

No. 2882

*No. 2882 Shock Absorber Wrench

For use in removing and replacing filler plug on V8 Ford shock absorbers. Has $\frac{7}{16}$ inch double square opening. Forged of 'CV' Chrome-Vanadium Steel.

No. F18

No. F18 Socket

A special socket of 'CV' Chrome-Vanadium Steel for Ford V8 connecting rod bearing cap nuts. Made with thin nose. Has $\frac{9}{16}$ inch hexagon opening. Is for $\frac{1}{2}$ inch square drive. Not Guaranteed.

No. 2105A

*No. 2105A Connecting Rod Bearing Wrench

For making adjustments on Ford Model "A" connecting rods. Overall length of wrench, 10 inches. Equipped with $\frac{21}{32}$ inch hexagon opening.

SPECIAL WRENCHES FOR FORDS

The Finest that Money Can Buy

No. 2612 Brake Wrench for Ford and Lincoln

A drop forged wrench with slotted, double hexagon openings for removal and replacement of flare nuts on Ford and Lincoln Zephyr hydraulic brake lines. Has panelled handle, chrome plated finish. Openings $\frac{3}{8}$ " and $\frac{1}{2}$ ". $4\frac{3}{4}$ " long.

No. 2612

Nos. *D21 and *4021 Sockets

These two sockets are used for adjusting Ford "A" and "AA" connecting rod bearing cap nuts. No. D21 has $2\frac{1}{32}$ inch double hexagon opening. No. 4021 has $2\frac{1}{32}$ inch single hexagon opening. Both are for $\frac{1}{2}$ inch square drive.

Nos. D21 and 4021

*No. 2588 Main Bearing Wrench

The adjustment of main bearing caps on the Ford V8 is greatly speeded with this tool. It holds the bearing bolts while the cap nuts are tightened or adjusted. The openings are $\frac{9}{16}$ " double square. No. 2587 is the ideal companion wrench for this one.

No. 2588

*No. 2416 Oil Pan Wrench

Used on Model "A", "V8" and "B4" Ford Oil Pans. Has $\frac{1}{2}$ inch hexagon opening. Length 17 inches overall. A very handy speeder for this job.

No. 2416

No. 2586 Carburetor Wrench

No. 2586 is a special tool for adjusting Ford V8 carburetor jets. It is an accurate tool to make precision adjustments. Made of 'CV' Chrome-Vanadium Steel.

No. 2586

*Will supply until stock is exhausted.

MISCELLANEOUS SPECIAL WRENCHES

No. 3118A Carburetor Wrench

A TuType wrench combining an open end and box wrench in one tool that will be found useful for general carburetor work. Has $\frac{1}{2}$ " double hexagon and $\frac{9}{16}$ " open end opening. Made of ZENEL Steel, chrome plated, with polished heads. Length $5\frac{7}{8}$ inches.

Open End Box Wrenches For Copper Tube Fittings

Drop forged of Bonaloy Steel, carefully heat treated and heavily chrome plated, these wrenches have slotted, double hexagon openings for removal and replacement of copper tube flare nuts and fittings. Heads are offset at 15° angle and openings are at 15° for efficiency. Handles are parallel and different size openings are in each end.

No.	Openings	Length
2612	$\frac{3}{8}$ " & $\frac{1}{2}$ "	$4\frac{3}{4}$ "
2618	$\frac{7}{16}$ " & $\frac{9}{16}$ "	5"

*No. 2629 Brake Wrench for Chrysler Built Cars

A drop forged, single head box wrench with $1\frac{1}{16}$ " double hexagon opening for brake use on Chrysler, Dodge, DeSoto and Plymouth cars. Has fully chrome plated finish.

No. 2875 Battery Wrench

Needed by every battery and service man. Made of BONALLOY Steel and is exceptionally strong. Designed especially for work on battery terminal nuts. Has $\frac{9}{16}$ inch and $\frac{5}{8}$ inch double hexagon openings. Length 6 inches.

No. 2881 Manifold Wrench

Designed for manifold work on a large variety of cars. Made of BONALLOY Steel, chrome plated. Double hexagon openings $\frac{9}{16}$ " and $\frac{5}{8}$ ". Length $7\frac{3}{4}$ inches.

*No. 2883 Starter Wrench For Chrysler

A special wrench of BONALLOY Steel designed especially for use on the starter nuts of late model Chrysler cars. Has $\frac{9}{16}$ inch and $\frac{5}{8}$ inch double hexagon openings. Overall length 9 inches. Has chrome plated finish with heads buffed to a high, permanent lustre.

MISCELLANEOUS SPECIAL WRENCHES

*The Finest that
Money Can Buy*

* No. 2626 Drain Plug Wrench For 1939 Mercury

A drop-forged wrench of BONALLOY Steel designed especially for removing and replacing the drain plug on 1939 Mercury and Ford standard and deluxe cars. It is chrome plated, has 2" double hexagon opening. Head is offset at 20°. Length overall 10³/₄ inches.

Box Wrench Attachments For Torque-Indicating Wrenches

Designed especially for drawing up cylinder head stud nuts with torque-indicating wrenches having 1/2" square drive, these box wrench attachments are made of BONALLOY Steel, with plated finish. They have double hexagon box wrench openings and can also be used with all standard 1/2" square drive socket handles and attachments.

No.	Double Hexagon Opening and Sweep
2613	3/4" close sweep
2614	3/4" wide sweep
2615A	1 1/16" close sweep
2615	5/8" close sweep
2616	5/8" wide sweep

Water Pump Packing Nut Wrenches

Many cars on the road today still require water pump packing nut adjustments, and the only proper way to make this adjustment is with Bonney water pump packing nut wrenches. The nut is usually of brass and very thin, and should only be tightened with a wrench and never with a drive punch and hammer. Wrenches to do this work must be very thin. Bonney 'CV' Chrome-Vanadium Water Pump Packing Nut Wrenches are designed especially for this adjustment. Their use for other classes of work or with added leverage is not recommended.

BONNEY BRAKE TOOLS

*The Finest that
Money Can Buy*

No. 2680 Brake Spring Plier

DESIGNED especially for the removal and replacement of internal brake springs on cars and trucks of all types and sizes, this new brake spring plier will be found unusually efficient.

The hooked end of the plier grasps the brake spring firmly, while the "goose-neck" pointed side of the plier makes firm contact with the brake lining on the shoe and prevents any possibility of slipping.

The plier can be used equally well in the removal of springs held in place by the hole in the brake shoe (Fig. 1), or by a stud attached to the brake shoe (Fig. 2).

In replacing brake springs on brakes that have the stud fastened to the brake shoe (Fig. 3), the notched end of the plier will be found exceptionally useful.

The No. 2680 Brake Spring Plier is drop forged of Bonaloy Steel, carefully heat-treated, with full chromium plated finish. It weighs only 11 ounces. Its 12½" length provides leverage to handle the strongest springs with ease.

No. 51 Brake Set

6 Pieces

Contains the six brake tools most often needed in the servicing and adjusting of brakes on practically all makes and models of cars and trucks. Individual tools are described on this page and pages 76 and 77.

Contents include on each:

Nos. 2566	Nos. 2561
2566A	2680
D2857	K50

packed in a handy leatherette roll.

No. K50 Brake Adjusting Gauge

A feeler gauge designed expressly for measuring clearance between brake drum and shoe. Blades are made from finest, imported Swedish Steel, carefully heat-treated and tempered to withstand wear. Each blade is tested to insure the exact thickness etched on it.

It is equipped with a knurled thumb nut for instant release and selection of the blade desired. When tightened, it holds the blade selected in working position, while blades not needed are securely locked in the handle.

No. K50 has 9 blades, each 4" long, in the following thickness—.006; .008; .010; .012; .015; .018; .020; .022 and .032.

*The Finest that

Nos. 2566 and 2566A

Nos. 2566 and 2566A

For making brake adjustments on cars equipped with Bendix Brakes. No. 2566 has $\frac{1}{2}$ " width blades, is $7\frac{1}{2}$ " overall. No. 2566A has $\frac{1}{2}$ " width blades, is 8" overall. Full chrome plated finish.

Nos. 2857 and D2857

Nos.*2857 and D2857

For making adjustments on brakes on Ford cars and trucks. Has $\frac{7}{16}$ " and $\frac{1}{2}$ " openings. Drop-forged and chrome plated. Length overall $10\frac{3}{4}$ ".

No. 2857—Square openings

No. D2857—Double Square openings

No. 2561

No. 2561

Specially designed for adjustment of Bendix Brake eccentric. Has $\frac{3}{16}$ " and $\frac{1}{4}$ " openings. Length overall 8".

No. 2599

No. 2599

Designed especially for adjustments on Bendix and other makes of hydraulic brakes.

The curved blade is for "star wheel" brake adjustments, while the open end is for adjusting the eccentric nut on all Bendix two shoe brakes.

Drop forged of Bonaloy steel with plated finish. Blade is $\frac{3}{8}$ " wide. Open end has $\frac{3}{16}$ " opening. Overall length $9\frac{1}{8}$ ".

No. 4564

*No. 4564

For adjustments on Oldsmobile, Pontiac and Buick "40" brake anchor pins. The box end is used on rear brakes, the open end on front brakes. Both ends have $1\frac{5}{16}$ " openings. Length $15\frac{1}{2}$ " overall.

Open End Box Wrenches For Copper Tube Fittings

Drop forged of Bonaloy Steel, carefully heat treated and heavily chrome plated, these wrenches have slotted, double hexagon openings for removal and replacement of copper tube flare nuts and fittings on hydraulic brake lines and gas lines. Heads are offset at 15° angle and openings are at 15° for efficiency. Handles are panelled and different size openings are in each end.

All are $6\frac{1}{4}$ " long, heads $\frac{7}{32}$ " thick.

Long Engineer's Wrenches

Designed especially for brake adjustments, spring clips, etc., these wrenches are drop-forged of 'CV' Chrome-Vanadium Steel, fully chrome plated and with polished heads.

No.	Openings	Thickness of Heads	Length
1731AL	$\frac{3}{4}$ " & $\frac{7}{8}$ "	$\frac{3}{8}$ "	15"
1034AL	$\frac{15}{16}$ " & $1\frac{1}{16}$ "	$\frac{17}{32}$ "	16"
1735L	1" & $1\frac{1}{8}$ "	$\frac{17}{32}$ "	16"

No. 2589

A special tool which is unusually useful in making certain brake and steering gear adjustments. Blade is $\frac{5}{64}$ " thick and $\frac{1}{4}$ " in width. Overall length is 7".

*No. 2862

Designed principally for anchor bolt adjustments on Bendix brakes this wrench is also especially adapted to brake adjustments on 1936 Buick cars. Drop-forged of Bonaloy Steel, it has $\frac{15}{16}$ " and $1\frac{1}{16}$ " double hexagon openings. Overall length is $15\frac{5}{8}$ ". Is fully chrome plated, with polished heads.

*No. 2582

A special tool designed especially for adjusting brake anchor pins on 1935 and 1936 Pontiac cars. Blades are $\frac{1}{2}$ " wide, $\frac{9}{64}$ " thick. Overall length is 9".

*No. 2581

Designed for and specially adapted to adjustments on all Steeldraulic brakes. Length $5\frac{1}{2}$ " overall.

*Will supply until stock is exhausted.

Adjustable Hack Saw Frame

Adjustable Hack Saw Frame

NO. 2628—A sturdily built, adjustable hack saw frame that will give long and satisfactory service. The checkered steel pistol grip fits comfortably in the hand. The back is reinforced and is adjustable for from 8" to 12" blades. Blades may be faced in four directions. Has full nickel finish. Makes a splendid frame for automotive and industrial mechanics. Net weight 1½ lb.

Flexible Hack Saw Blades

(Tungsten Alloy Steel)

Flexible Back-Hardened Teeth

The teeth in these blades are carefully milled and set for fast cutting. The blades are correctly hardened and tempered.

Flexible Hack Saw Blades

Shop Knife

Handy for opening
cartons

No. 199 Shop Knife

One of the handiest tools in the Bonney Line. A strong, light-weight, perfectly balanced shop knife that every mechanic should have in his tool kit. Supplied with five razor-keen blades in the handle. Especially suited for trimming upholstery, top material, rubber, leather, etc. and for cutting gaskets, shims, kickboards, cardboard, etc. Indispensable for opening cartons. Turn the blade crosswise in the handle and it makes a dandy scraper for removing old inspection stickers from windshields. Length overall 6".

MISCELLANEOUS SPECIAL TOOLS

The Finest that Money Can Buy

BONNEY Feeler Gauges

Bonney Feeler Gauges are made from the finest, imported Swedish Steel, carefully heat-treated and tempered to withstand wear. Each blade is tested to insure the exact thickness which is etched on it.

Bonney Feeler Gauges are equipped with a knurled thumb nut for instant release and selection of the blade desired. When tightened, this thumb nut securely holds the blade selected in working position, while blades not needed are securely locked in the handle.

No. K50 Brake Adjusting Gauge

For measuring clearance between brake drum and shoe. 9 blades 4" long in the following thicknesses—.006; .008; .010; .012; .015; .018; .020; .022 and .032.

No. K51 General Purpose Gauge

Especially for tappet and ignition work—the most popular gauge on the market. 10 blades 1 5/8" long, 10 blades 3 5/16" long and 3" point file. Short blades in following thicknesses—.012; .013; .014; .018; .020; .022; .024; .025; .028; .032. Long blades in following thicknesses—.002; .003; .004; .005; .006; .007; .008; .010; .013; .015.

No. K52 Ignition Gauge

Contains 10 narrow blades 1 5/8" long and 3" point file for ignition, distributor points and spark plugs. Thickness of blades included as follows—.012; .013; .014; .018; .020; .022; .025; .028; .032 and .035.

No. K53 Universal Master Gauge

Has full range of spacers—25 blades, each 3 5/16" long in following thicknesses—.0015; .002; .003; .004; .005; .006; .007; .008; .009; .010; .011; .012; .013; .014; .015; .016; .018; .020; .022; .024; .025; .028; .030; .032 and .035.

No. K54 Standard Feeler Gauge

Contains 10 blades 3 5/16" long in following sizes—.002; .003; .004; .005; .006; .007; .008; .010; .012 and .015.

No. K55 Extra Long Feeler Gauge

Exceptionally useful for pistons, etc. Has 8 blades, each 8 5/8" long in the following sizes—.002; .003; .004; .005; .006; .008; .010; .015.

No. K56 Single End Feeler Gauge Stock Holder

POSITIVE ADJUSTABLE LOCK

Any thickness of feeler gauge stock coils within the handle and can readily be pulled out for use. Any desired length of strip stock or standard 12" blades may be used. Positive sliding lock securely holds blades. Made from hard drawn, cold rolled steel and satin nickel plated. Length 4 1/2". Weight 1 oz.

Extra Blades

Designed to fit practically any holder, the 3 5/16" blades are available in all the popular range of thicknesses and with hole for insertion in gauges. The 12" lengths are popular for use in the No. K56 Stock Holder which makes the blades usable to the end.

Both 3 5/16" and 12" blades are packed 6 in a cellophane envelope. Sizes are listed below.

10"	10"
12"	12"	12"
14"	14"	* 14"

Standard Package Quantities—Files up to and including 10" in length are packed 1 dozen to the package. Files over 10" in length are packed 1/2 dozen to the package.

**Will supply until stock is exhausted.*

File Handles

Handles are of wood—plain, without finish. They have metal ferrule which prevents splitting at the file tang opening. Made in three sizes—Small for 5" and 6" files; Medium for 8" and 10" files; Large for 12", 14" and 16" files.

Point File

The Bonney Point File is a quality file, guaranteed to file platinum and tungsten points on all ignition systems. 5 3/8" long overall. Sold one dozen on attractive display card.

Handy Holding Tools

These tools are ideal for screw holding, gripping, inserting, removing and picking up. They work equally well on screws, washers, nuts, bolts, taper pins, valve pins and similar objects.

The four fingers (made of spring steel) are forced outward and open when pressure is brought on the plunger. When the pressure is released the strong coil spring closes the fingers tightly around the object. It is impossible for the object to lean over or fall out.

Bonney Handy Holding Tools are used by electricians, radio service men, locksmiths, piano tuners, and in servicing typewriters, adding, calculating, linotype and similar machines, as well as by automotive mechanics.

Finished in full nickel.

No. RF70 Tube Cutter

HERE'S a fine quality, compact, light, strong cutter for brass or copper tubing from $\frac{1}{8}$ " to 1". The razor-edge cutting wheel is of alloy steel and gives a quick, clean cut. Put the cutter on the tubing, screw the rollers up tight and simply turn the tool around the tubing until the cut is made. No additional adjustment of the screw is needed. The tubing is not distorted and the rollers smooth the tube ready for soldering or flaring. Net weight 1 lb.

No. RF70

No. RF59 Tube Cutter

A compact, efficient tube cutter for all tubing from $\frac{1}{8}$ " to 1" O. D. Body is an alloy die casting. Wafer-tapered, hardened cutting blade makes cutting easy and with practically no burr. The slide-lock safety reamer opens instantly and protects the hands when not in use. It may be safely carried in your pocket. A low-priced, quality tool. Net weight $\frac{1}{2}$ lb.

No. RF59

Tube Benders

EXTERNAL TYPE

Ideal for bending copper and other tubing by hand to any desired shape without collapsing the tube.

Made of special oil-hardened spring steel, cadmium plated. The belled end assures ease in removing the tubing after the bend has been made.

The Finest that Money Can Buy

BONNEY STILLSON WRENCHES

BONNEY Stillson Wrenches are correctly designed and sturdily built. They are made of materials considered most suitable for the work to which wrenches of this type are subjected. The handles and jaws are drop-forged and specially heat-treated to produce tough, durable teeth. The knurled adjusting nut is machined from solid stock to assure smooth working surfaces, while the frame is a semi-steel casting.

Length	Grips Pipe	Length	Grips Pipe
6"	1/8" to 1/2"	18"	1/4" to 2"
8"	1/8" to 3/4"	24"	1/4" to 2 1/2"

Open End Adjustable Wrenches

Nos. K10 to K15

Nos. K24 to K29

Nos. K17 to K22

Auto Wrench

Open End Adjustable Wrenches

BONNEY Open End Adjustable Wrenches are designed to fit either square or hexagon nuts. They are drop forged of alloy steel, fully chrome plated, with polished jaws. Jaws are unusually thin to get into normally inaccessible places. Both handle and jaw are hardened and tempered in oil. They will not break or wear in the gear teeth and allow play in the wrench, permitting the jaw to slip off the nut. Four tempered threads meshing in the forged jaw permit great pressure on the handle.

Five sizes of Bonney open end Adjustable Wrenches are available as listed in the table below.

Number	Size (Length)	Capacity	Net Weight each
BW4	4"	1/2"	3 oz.
BW6	6"	3/4"	5 oz.
BW8	8"	15/16"	10 oz.
BW10	10"	1 1/8"	1 lb. 1 oz.
BW12	12"	1 7/16"	1 3/4 lb.

Auto Wrenches

A very useful and handy wrench for many purposes. Drop-forged of quality steel and full polished.

Two sizes—9" and 11" lengths.

Spinner Wrenches

DESIGNED especially for reaching the little nuts that can be handled only with exceptionally small sockets. Made like a screw driver with a wood handle and a hexagon socket on the end that grips the nut firmly.

The shanks are of 1/4" hexagon rod. They can be gripped with pliers or a wrench to loosen an unusually tight nut.

Furnished in 6" or 9" length, or in bent handle type as shown.

No.	Hexagon Opening	Overall Length

*The Finest that
Money Can Buy*

BONNEY Screw Drivers are made with solid, forged, one-piece blades. The blades are formed with an upset shoulder against which the handles are forced (except in the electricians' pattern). Each blade is heat treated throughout its entire length and is ground and polished. They are firmly anchored in the handles to prevent turning or loosening. The tips are accurately taper ground to insure a non-slip fit in screw slots.

BONNEY SCREW DRIVERS

All screw drivers shown on this page and page 85 have exceedingly tough handles that are non-conductors of electricity. The handles are fluted and provide a secure, comfortable grip. Bonney Screw Drivers are not only the most durable and most practical drivers ever offered to the mechanic, but are finished in keeping with the high quality of the tool.

Round Shank

Solid, forged, one-piece blades are forced into handles against the upset shoulder to insure an absolutely tight fit. The blades are heat treated throughout their entire length. Handles are of transparent, non-conducting composition.

No.	Length of Blade	Width of Tip	Overall Length
04	4"	1/4"	7 3/4"
06	6"	5/16"	10 1/4"
08	8"	3/8"	13"
012	12"	7/16"	17 1/2"

Square Shank

Blades are forged in one piece, heat treated their full length and firmly anchored in the handles. Handles are non-conductors of electricity. The tip is not merely an extension of two of the square shank surfaces, but is forged and taper-ground.

No.	Length of Blade	Width of Tip	Overall Length
S04	4"	5/16"	7 3/4"
S06	6"	7/16"	10 1/4"
S08	8"	1/2"	12 3/4"
S012	12"	1/2"	17 1/2"

Electricians'

This line of screw drivers has many uses in electrical work. They are of the same high quality and finish as the drivers described above. Made in three sizes.

No.	Length of Blade	Width of Tip	Overall Length
003	3"	3/16"	6 1/2"

BONNEY SCREW DRIVERS

No. 001 Pocket Size

EVERY mechanic has need for a pocket size screw driver. The No. 001 will "fill the bill" in every way. Clip for securely holding the driver in pocket supplied with each one. The blade is forged with taper-ground tip and the handle is of transparent, non-conducting composition.

No.	Length of Blade	Width of Tip	Overall Length
001	2"	1/8"	4"

No. E02 Pocket Size With Neon Tube

For "out on the road" jobs, this screw driver is one of the handiest tools in a mechanic's kit.

It has a tough, composition handle that is a non-conductor of electricity, with a neon tube for testing spark plugs. The tip is magnetized and a wire guard slides over the tip to protect the pocket. A handy, pocket clip is also supplied. The blade is forged of special screw driver steel, heat-treated, with taper-ground tip.

No.	Length of Blade	Width of Tip	Overall Length
E02	2 1/4"	1/8"	5"

*No. 00A Instrument Screw Driver

A mighty handy little tool for making delicate adjustments on fine electrical, radio and ignition apparatus. Made in exactly the same way and of the same quality materials as its "big brothers" shown on the preceding pages. Handle is non-conductor type.

No.	Length of Blade	Width of Tip	Overall Length
* 00A	1 1/2"	1/16"	2 7/8"

*Will supply until stock is exhausted.

No. E03 With Neon Tube

The neon tube in the tough composition handle of this screw driver makes it a most useful tool for automotive and electrical work. It's made to stand hard usage.

When testing spark plugs, a brilliant, orange flash shows the plug is O. K. Completely shorted plugs produce no flash. A "stringy" flash shows the plug is partly fouled.

The blade is forged with taper-ground tip and securely anchored in the handle.

No.	Length of Blade	Width of Tip	Overall Length
E03	3"	3/16"	6 1/2"

Adjusting

A strong, sturdy screw driver for making fine adjustments. The handle is designed to fit comfortably in the hand and to provide a firm grip. It is of transparent, non-conducting composition.

No.	Length of Blade	Width of Tip	Overall Length

BONNEY WOOD HANDLE SCREW DRIVERS

No. WO3 Series

THIS line of quality, wood handle screw drivers will stand up under severe use. Blades are drop-forged from selected alloy steel and carefully heat treated their entire length. Tips are taper-ground.

The hardwood handles are fluted to provide a firm, comfortable grip and bolsters firmly anchor the blades to the handles.

No.	Length of Blade	Width of Tip	Overall Length
W03	3	$\frac{7}{32}$	$7\frac{1}{4}$
W04	4	$\frac{1}{4}$	9
W06	6	$\frac{5}{16}$	$11\frac{3}{4}$
W08	8	$\frac{3}{8}$	$14\frac{1}{2}$
W010	10	$\frac{7}{16}$	$16\frac{1}{2}$

No. WO5 Screw Driver Set

This assortment contains one each of numbers W03, W04, W06, W08 and W010. It offers a remarkably complete set which meets practically every screw driver need. All of them are made to withstand long, severe use. Balance which distinguishes all fine tools is built into every Bonney Screw Driver.

No. WO15 Tappet Adjusting Screw Driver

A wood handle tool similar to a screw driver for tappet adjusting jobs on overhead valve motors (Chevrolet, Buick, etc.) It is designed so that it cannot slip out of the slot. To be used in connection with open end wrench for tappet adjustments. Length overall $6\frac{1}{2}$ ".

Bonney Replaceable Bit Screw Driver

For Phillips and Slotted Head Screws

One handle—5 bits—give you five quality screw drivers for little more than the price of one.

Chuck or bit holder is an improvement on the principle of taper shank engagement. Insert proper bit in chuck and tap it on a piece of wood to secure it in place. Rap bar lightly, near the tip, to release the bit.

The chuck is forged as an integral part of the tempered alloy steel bar. The hardwood handle is securely fastened to the bar and provides a comfortable grip. The bits are made of high quality alloy steel. They are carefully tempered and hardened to give maximum wear for driving case-hardened screws. Precision made, they will prove entirely satisfactory where exact fit of bit to screws is necessary.

No.	Description
W8	Assortment, includes No. W8-1 Bit Holder and one each Bits Nos. W8-2, W8-3, W8-4, W8-5 and W8-6.
W8-1	Bit Holder, Wood Handle, $8\frac{1}{4}$ " overall, weight 4 oz.
W8-2	Bit, fits Phillips Screws Nos. 5 to 9 (No. 2 Phillips Recess).
W8-3	Bit, fits Phillips Screws Nos. 10 to 16 (No. 3 Phillips Recess)
W8-4	Bit, fits slotted head screws Nos. 5—7 (actual thickness of bit .030")
W8-5	Bit, fits slotted head screws Nos. 7—9 (actual thickness of bit .035")
W8-6	Bit, fits slotted head screws Nos. 9 and larger (actual thickness of bit .040").

BONNEY SCREW DRIVERS

To Fit Phillips Screws

Wood Handle Type

THESE screw drivers are made with the same care and precision as the regular type wood handle screw drivers described on page 86. Available in four sizes to cover the entire range of screws shown in the table.

No.	Blade		Overall Length	Fits Phillips Screws
	Length	Diameter		
WP1	3"	9/64"	6 1/4"	No. 4 and smaller
WP2	4"	1/4"	8 3/4"	No. 5 to No. 9 inc.
WP3	6"	5/16"	11"	No. 10 to No. 16 inc.
WP4	8"	3/8"	14 1/2"	No. 18 and larger

No. WP Screw Driver Set

This set contains one each numbers WP1, WP2, WP3 and WP4 to cover the entire range of Phillips Screws.

Wood Handle Short Type

For cramped quarters—in tightening windshield mouldings and on similar jobs—that cannot be reached with regulation length screw drivers, these short screw drivers will be found mighty convenient. Of quality equal to regulation length, wood handle screw drivers for Phillips screws.

No.	Blade		Overall Length	Fits Phillips Screws
	Length	Diameter		
SP1	1"	9/64"	2 7/8"	No. 4 and Smaller
SP2	1 3/8"	1/4"	3 5/8"	No. 5 to No. 9 inc.

Composition Handle Type

These fine quality screw drivers to fit Phillips screws have transparent, amber-colored composition handles that are non-conductors of electricity. Blades are drop-forged and carefully heat treated their entire length. They are securely fastened in the handles to prevent turning or loosening. The four sizes shown will take care of all size of Phillips screws. The shank on the No. CP4 is hexagon for more than half its length to allow the use of a wrench to gain added leverage.

No.	Blade		Overall Length	Fits Phillips Screws
	Length	Diameter		
CP1	3"	9/64"	6"	No. 4 and smaller
CP2	4"	1/4"	7 3/4"	No. 5 to No. 9 inc.
CP3	6"	5/16"	10 1/4"	No. 10 to No. 16 inc.
CP4	8"	3/8"	11"	No. 18 and larger

No. CP Screw Driver Set

The No. CP Set will fill every requirement for screw drivers to fit Phillips screws. The garnish moulding and hinges on late model cars are fastened with Phillips screws. They are also used on truck and bus bodies. One each of numbers CP1, CP2, CP3 and CP4 are included.

* No. T33 Blade For Phillips Screws

Made of 'CV' Chrome-Vanadium Steel, chrome plated and polished, this blade is for use with 3/8" square drive handles and attachments. It is 3/8" in diameter 8 3/4" long overall and will fit No. 18 and larger size Phillips screws.

No. 2P3 Offset Screw Driver

Drop forged of special screw driver steel with natural finish this offset screw driver will be found exceptionally useful in adjusting Phillips Screws No. 5 to No. 9 inclusive and No. 10 to No. 16 inclusive where overhead clearance is limited. Overall length 6 1/8".

*Will supply until stock is exhausted.

No. 2680 Brake Spring Plier

Patent Pending

AN unusually efficient brake spring plier designed especially for the removal and replacement of internal brake springs on all types and sizes of cars and trucks.

Combination Pliers

THIS series of combination pliers satisfies the demand for a line of pliers for general "all-purpose" work. They are accurately made of special steel to give them unusually long life. They are full finished and the handles are knurled. Great care was taken in the design to give them the perfect balance that promotes speedy work.

Nos. B5, B6, B8 and B10 are identical except for size. No. B15 has the additional feature of side-cutting jaws.

No.	Description
B5	Combination Plier, 5"
B6	Combination Plier, 6"
B8	Combination Plier, 8"
B10	Combination Plier, 10"

B15—Combination Plier (Side Cutting), 6 in.

The hooked end of the plier grasps the brake spring firmly, while the "goose neck" pointed side of the plier makes firm contact with the brake lining on the shoe and prevents any possibility of slipping.

The plier can be used equally well in the removal of springs held in place by the hole in the brake shoe or by a stud attached to the brake shoe.

In replacing brake springs on brakes that have the stud fastened to the brake shoe, the notched end of the plier will be found exceptionally useful.

Figure 1 illustrates the use of the plier in removing springs from brake shoes with the hole. Figure 2 illustrates the removal of the spring from brakes with the stud, and Figure 3 illustrates the ease with which springs may be replaced on brakes with the stud.

The No. 2680 Brake Spring Plier is drop forged of Bonaloy Steel, carefully heat-treated, with full chromium plated finish. It is light in weight, weighing only 11 ounces. The 12½" length of this plier permits leverage to handle the strongest springs with ease.

BONNEY PLIERS

Thin Nose Combination Pliers

THIS TYPE of plier is the thin nose design which has many different uses. It is especially valuable for work in cramped spaces. Made of highest grade alloy steel. Completely polished and plated, with knurled handle.

No.	Description
B11	Combination Plier (Thin Nose), 5"
B12	Combination Plier (Thin Nose), 6"

Thin Nose Combination Plier

Linemen's Cutting Pliers

Made from alloy steel, light in weight and of great strength. The handles fit the hand perfectly and are knurled. The cutting qualities are unsurpassed. Full polished finish.

No.	Description
B22	Linemen's Plier, 6"
B23	Linemen's Plier, 8"

Linemen's Cutting Plier

No. B17 Diagonal Cutting Plier

This plier is drop-forged from special analysis steel. The cutting edges are built to give long, hard service. Full polished finish with knurled handles. Length 6".

Diagonal Cutting Plier

No. B18 Heavy Duty Diagonal Cutting Plier

Drop forged from a high grade, special analysis steel, this plier is heat treated throughout its entire length. The long cutting edges are carefully ground and made to withstand the hardest service. Finished with polished head and blued handles. Overall length 7".

Heavy Duty Diagonal Cutting Plier

Long Nose Side Cutting Plier

Headlight Bulb Plier

Lock Ring Plier

Self-Gripping Battery Plier

Diagonal Cutting Plier

Combination Side Cutting Plier

BONNEY PLIERS

No. B25 Long Nose Side Cutting Plier

This is a long, fine, spring-tempered nose, side cutting plier, drop-forged from alloy steel and carefully heat treated. The long nose of this plier will reach into tight places inaccessible with any other plier, and the keen edged cutter will cut practically any wire found in automotive work except the heavier ignition and battery cables. Each tool is individually tested for strength and cutting ability. Finished with polished nose and blued handles. Length 6".

No. B24 Headlight Bulb Plier

A plier needed by every mechanic and service station attendant for removing broken headlight bulbs. Drop-forged of special steel with jaws shaped to fit around base of bulb and notched to insure a secure grip. Plated finish. Length overall 8 1/4 inches.

No. B21 Lock Ring Plier

Designed especially to spread the snap lock rings and horseshoe type of brake key in order to remove them from brakes, transmissions, differentials, pedal, clutch and fan pulley shafts when removing them from the assembly. Drop-forged of chrome-alloy steel, chrome plated, with high permanent lustre. Outside of jaws are toothed to prevent any possibility of slipping. Plier will spread any lock ring washer up to 1 1/4" in diameter. Length 8".

Champion-DEARMENT Pliers

No. B307 Self-Gripping Battery Plier

Drop forged of high grade alloy steel, the jaws of this plier will take positive grip on anything that can be inserted in them. Pressure need be applied to only one handle. Joint is constructed to remove all strain from rivet. Blued finish, with knurled handles. Capacity 1/4" to 5/8". Length 7 inches. Net weight 6 ounces.

No. B437 Diagonal Cutting Plier

Drop forged from special alloy steel and carefully heat treated. Handles are deeply knurled and shaped to assure a comfortable grip. Polished finish. Length 7 1/4". Net weight 8 ounces.

No. B537 Combination Side Cutting Plier

Drop forged of alloy steel, heat-treated, this Champion DeArment Combination Side Cutting Plier is accurately and carefully made. Side cutting jaws are accurately ground. Handles are deeply knurled and provide a comfortable grip. Finished with blued handles and polished jaws. Length 7 1/2". Net Weight 8 1/2 oz.

CHANNELLOCK

TRADE MARK

REG. U. S. PAT. OFFICE

PLIERS

Note the Channellock

No. B410 Self-Gripping Plier

The tongue and groove Channellock joint in these Self-Gripping Pliers provides a vise-like grip entirely independent of the gripping power of the user's hand. The most stubborn nut or pipe may be turned merely by applying pressure to one handle of the tool. The large bearing surface of the Channellock joint provides quick, positive adjustment, eliminating any possibility of shearing the joint bolt even under the extreme power provided by the plier. Made of highest grade alloy steel, carefully heat treated, with polished finish. Has four adjustments, providing gripping capacity from $\frac{3}{16}$ " to $1\frac{1}{8}$ ". Length $9\frac{1}{2}$ ", net weight 15 oz.

No. B420 Pump Plier

Light and thin, but of exceptional strength because of the Channellock feature, this plier is particularly serviceable in adjusting packing gland nuts on practically all cars, trucks and smaller industrial engines. The strain is removed from the bolt because of the Channellock feature, and there is no danger of the bolt breaking. Drop forged from special alloy steel, carefully heat treated. Has polished finish, knurled handles. Five adjustments provide a capacity from $\frac{1}{2}$ " to $1\frac{7}{8}$ ". Length $9\frac{1}{2}$ ". Net weight 11 ounces.

No. B424 Ignition Plier

Drop forged from finest quality alloy steel, carefully heat treated, this plier has unusual strength because of the patented Channellock design. Because of the design, there is no strain on the bolt and no danger of the bolt breaking. Has polished finish, four adjustments. Length $4\frac{1}{2}$ ". Net weight $1\frac{1}{3}$ ounces.

No. B407 General Purpose Plier

Drop forged of special alloy steel and carefully heat treated, this revolutionary plier has the patented Channellock feature. Self-gripping jaws take positive grip on acid corroded and mutilated battery terminal nuts. Pressure need be applied to only one handle. The more pressure the tighter the pliers grip. All strain is removed from the bolt. The thin nose clears filler caps.

Has two adjustments providing capacity from $\frac{1}{8}$ " to $\frac{9}{16}$ ", making it useful for removing small grease plugs, Alemite and small copper connections, etc. Also adaptable for brake rod connections. Has polished finish with knurled handles. Length 7 inches, net weight $\frac{1}{2}$ lb.

*Known as a gasket hammer.

No. PH19 Tire and Rim Hammer

Drop-forged from a high grade hammer steel and carefully heat treated, this tire and rim hammer will be found to answer every requirement for this type tool. The head has polished finish. The handle is of the finest, straight grained, young hickory, securely fastened in the head. Head weight 3 lbs. Length overall, 16 inches.

The Finest that Money Can Buy

BONNEY SOFT FACE HAMMERS

No. PH17 Series

BONNEY Soft Face Hammers have tough, amber colored cellulose tips that are replaceable. Handles are of quality hickory, shaped to afford a comfortable grip and are wedged securely in the steel center head.

These hammers are especially useful in aircraft factories, in body and fender repair work, etc., for shaping and forming light sheet metals, as well as in numerous assembly jobs requiring a hammer that will not mar a finely finished surface or delicate machine parts.

Handles are lacquered red with orange end and the steel center head is orange.

Hammers Complete With Tips

Light Bumping Hammer

Dinging Hammer

Light Dinging Hammer

Special Bumping Hammer

Upholsterers' Magnetic Hammer

Tack Claw

Bumping Hammer

No. PH22—Of the same construction described above, this hammer has polished faces and black body. Head $4\frac{1}{4}$ inches long. Round face $1\frac{1}{4}$ inches in diameter. Square face $1\frac{1}{4}$ inches square. Overall length 12 inches.

Light Bumping Hammer

No. PH23—A light weight finishing hammer with polished faces on the head and black body. Head 4" long. Round face $1\frac{1}{4}$ inches diameter. Square face $1\frac{1}{8}$ inches square. Overall length $11\frac{1}{2}$ inches. Headweight 9 oz.

Dinging Hammer

No. PH24—A finishing hammer with faces crowned and polished—body of head finished in black. Head 6 inches long. Large face $1\frac{5}{8}$ inches diameter. Small face $1\frac{1}{4}$ inches diameter. Overall length 12 inches. Head weight 13 oz.

Light Dinging Hammer

No. PH25—A sturdily made, light weight finishing hammer. Head $6\frac{1}{2}$ inches long. Large face $1\frac{1}{4}$ inches square. Small face $1\frac{1}{16}$ inches diameter. Overall length $11\frac{1}{2}$ inches. Head weight 10 oz.

Special Bumping Hammer

No. PH26—The head is drop-forged with bullet shaped end which makes it easy to remove small dents. Face of the head is polished with body finished in black. Strong hickory handle. Head 4 inches long. Overall length 12 inches. Head weight 7 oz.

Upholsterers' Magnetic Hammer

No. PH27—Head is $5\frac{1}{2}$ inches long, polished all over and one end is magnetized. Overall length 12 inches. Head weight 7 oz.

Tack Claw

No. PH28—For attaching to handle of No. PH27 Upholsterers' Magnetic Hammer. Full polished finish. Weight 1 oz.

BODYWORKERS' and UPHOLSTERS' HAMMERS

*The Finest that
Money Can Buy*

Fender Bumper

NO. PH29—Used underneath the fender in roughing out bumps. Its design eliminates the necessity of removing the wheels. Head 8 inches long. Face $1\frac{5}{16}$ inches diameter. Overall length 14 inches. Head weight $1\frac{1}{2}$ lbs.

Fender Bumper Mallet

NO. PH30—Has rubber composition head which excels hickory for durability. It will not shatter, chip or split. Handle is of hickory. Head $2\frac{1}{2}$ inches in diameter, $4\frac{1}{2}$ inches long. Handle is $11\frac{1}{2}$ inches long.

Long Nose Pricking Hammer

NO. PH31—Has long reach pein used in driving up small dents. Drop-forged of selected hammer steel with fine quality hickory handle. All working surfaces highly polished. Head $9\frac{1}{2}$ " overall. Face $1\frac{5}{8}$ " diameter. Length 12" overall. Head weight 15 oz. Packed $\frac{1}{3}$ dozen to the box.

Point Dinging Hammer

NO. PH32—Has medium length point for driving up small dents. Drop-forged steel, with fine hickory handle. Working surfaces highly polished. Head $6\frac{3}{4}$ " overall. Head weight 13 oz. Packed 6 to the box.

Cross Pein Bumping Hammer

NO. PH33—For work on beads, mouldings and sharp corners this Cross Pein Bumping Hammer is ideal. Head is drop-forged steel with polished working surfaces. Handle is first quality hickory. Head $5\frac{1}{4}$ " overall. Round face $1\frac{1}{4}$ " diameter. Pein $\frac{5}{8}$ " wide. Length overall $11\frac{1}{2}$ ". Head weight 9 oz. Packed 6 to the box.

Offset Dinging Hammer

NO. PH34—The offset faces of this hammer permit striking a flat face blow while working on a crowned surface or uneven angles. Head is drop-forged steel with polished working surfaces. Handle of fine quality hickory. Head $6\frac{1}{4}$ " long. Head weight 10 oz. Packed 6 to the box.

No. F2 Regular or Toe Dolly Block

DROP-FORGED of selected steel and full surface ground and polished. Length $4\frac{3}{4}$ inches. Width $2\frac{1}{2}$ inches. Thickness $1\frac{1}{16}$ inches. Weight $2\frac{1}{2}$ lbs.

No. F3 Heel Dolly Block

Drop-forged of steel most suitable for this type tool. Full surface ground and polished. Length $2\frac{1}{2}$ inches. Width $3\frac{1}{8}$ inches. Thickness $1\frac{1}{2}$ inches. Weight $2\frac{1}{4}$ lbs.

No. F4 Bar Dolly Block

Drop-forged steel and full surface ground and polished. Length $4\frac{1}{4}$ inches. Width 2 inches. Thickness $1\frac{1}{2}$ inches. Weight 3 lbs.

No. F5 Wedge Dolly Block

Designed especially for work on turret tops. Drop-forged of selected steel, with working surfaces highly polished. Length 5". Width $2\frac{1}{2}$ ". Weight $2\frac{1}{2}$ lbs.

No. F6 General Purpose Dolly Block

Full surface ground and polished. Weight 3 lbs.

No. F7 Budd Dolly Block

Drop-forged of selected steel. Full surface ground and polished. Its curved surfaces are designed so that it will take care of any repair on a Budd Body. Each block is carefully gauged after it is polished to insure correct radii of the curves. Weight 3 lbs.

No. F8 Fender Dolly Block

Designed especially for repairs to fenders with rolled edges and beads. The small curved end works perfectly under the rolled edge. All working surfaces of this drop-forged dolly are highly polished. Length 4". Width $2\frac{3}{4}$ " at bead end, $2\frac{1}{2}$ " at heel end. Weight $2\frac{1}{2}$ lbs.

No. F9 Fender Bracket Dolly

Drop-forged steel. The working face is polished and body is black enamel. Shaped so that it can be inserted between the fender bracket and fender. The curves have been worked out to take care of 10 leading makes of cars. Weight $1\frac{3}{4}$ lbs.

No. F10 Small Hand Hold Dolly

Working surfaces are ground and polished. Weight $2\frac{1}{4}$ lbs.

No. F12 Large Hand Hold Dolly

Working surfaces are ground and polished. Weight $3\frac{1}{2}$ lbs.

BONNEY PUNCHES

The Finest that Money Can Buy

CHISELS, Punches and similar hand tools are naturally subjected to very severe service. Bonney has spared no effort to meet these conditions and to offer the best in tools of this type. All are forged of the special alloy steel

which stands up best in the service to which they are put and are carefully heat treated.

Heads are comparatively soft which reduces chipping and allows them to be readily redressed when battered.

PUNCH AND CHISEL SETS

BONNEY Punches and Chisels are forged from selected alloy steel and carefully heat treated. Their working bits are hard and tough enough to work on any untempered material, but sufficiently soft to be resharpened with a file. Their comparatively soft heads reduce chipping to a minimum and allow them to be readily redressed when battered. No better tools of this type can be purchased anywhere.
